NF-2400

Nitrogen Generator

The Highest Output Membrane System in its Class

The NitroFill NF-2400 is the standard against which all other membrane nitrogen generation systems are measured. With more units in service than most other brands and manufacturers combined, NitroFill has earned a reputation for unrivalled performance and durability ... and the NF-2400 is the most powerful and advanced membrane generator we produce.

With a whopping 24 cfm output and plug and play ease of use, the NF-2400 is the perfect system for commercial truck and fleet facilities seeking the simplicity of a membrane system. The NF-2400 provides enough output to inflate a 12.00R X 22.5 tire from zero to 120 psi in less than 3.5 minutes!

Features:

- Complete system, nothing else to buy.
- Triple in-cabinet mounted high performance inlet air filters.
- On-board Purity Analyzer.
- On-board Inlet Air and Nitrogen Pressure gauges.
- Automatic Economizer System.
- Simple, reliable "Single" membrane design.
- Ultra High Output with guaranteed purity up to 99.9%.
- "Best in Class" 24 cfm output makes the NF-2400 a fit for almost any size truck or fleet service facility.
- 5 year warranty*
- Each unit comes fully assembled, just plug and play!

General Specifications

| | |
|-----------------------------------|------------------------------|
| Power Requirement | 100-120Vac 50/60Hz |
| Operating Temperature | 36°F to 122°F |
| Compressed Air Input Range | 125-185psi |
| Compressed Air Quality | 0.01 ppm |
| Nitrogen Purity | 95-99+% (Adjustable) |
| Nitrogen Output | 24 CFM rated at 160psi, 80°F |
| Maximum Nitrogen Pressure in Tank | 145-174psi |
| Operating Range | 5-162psi |
| Shipping Weight | 202 Pounds |
| Net Weight | 137 Pounds |
| Dimensions (Container) | 74"H x 26"W x 24"D |
| Dimensions (Unit) | 71"H x 22"W x 20"D |
